PRESS RELEASE

For Immediate Release
January 24, 2017

Nevada's Metro Areas Experience Drop in Unemployment in December

CARSON CITY, NV—The jobless rate in Las Vegas declined to 5 percent in December, down 0.2 percentage point over the month and, more importantly, down 1.2 percentage points over the year, said Bill Anderson, chief economist for the Research and Analysis Bureau of Nevada's Department of Employment, Training and Rehabilitation.

Carson City and Reno/Sparks both saw no change over the month, with Carson City's unemployment standing at 5.3 percent and Reno/Sparks at 4.2 percent. However, these rates represent declines of 1.4 percentage points over the year in Carson City and 1.3 percentage points over the year in Reno/Sparks.

Las Vegas added a seasonally-adjusted 4,400 jobs, while Reno/Sparks saw a seasonally-adjusted loss of 1,100 jobs. Carson City saw a seasonally adjusted loss of 200 jobs. Over the year, however, Las Vegas has added 24,300 jobs, while Reno/Sparks gained 7,100. Carson City's job levels remain unchanged over the year.

"This month's unemployment rates mark the lowest December rates for the metro areas since 2007, except in Reno, where the December rate hasn't been lower since 2006," Anderson said. "The metro areas experienced similar patterns of improvement as the state as a whole, which saw the lowest unemployment rate in December in nine years, at 5.1 percent. Despite some volatility over the month in job growth, gains were positive or steady over the year in all three metro areas."

ABOUT THE RESEARCH AND ANALYSIS BUREAU

The Research and Analysis Bureau is Nevada's premier source for labor market information. A part of DETR, the Bureau is responsible for creating, analyzing, and reporting Nevada's labor market information, in cooperation with the United States Bureau of Labor Statistics (BLS).

DETR is comprised of the Employment Security Division, Equal Rights Commission, Rehabilitation Division, and the Research and Analysis Bureau. DETR oversees the Nevada JobConnect System to provide training and job placement services to job seekers and to assist employers in hiring practices. It also supports economic development efforts through improving Nevada's workforce.

NEVADA SUB-STATE LABOR MARKET OVERVIEW

December 2016

Despite strong Statewide job gains this month, the Silver State's largest metro areas experienced mixed job growth in December. Across the State, seasonally-adjusted employment increased by three percent, a gain of 3,400 jobs. Las Vegas employment saw the largest improvement by adding 1,300 jobs when 3,100 jobs were expected to be lost according to historical trends, resulting in a seasonally adjusted gain of 4,400 jobs. Reno/Sparks lost 1,100 jobs when no seasonal movements were expected, resulting in a seasonally adjusted loss of 1,100 jobs. Finally, Carson City lost 100 jobs when

Nevada Nonfarm Jobs: November - December Change

	Unadjusted Change	Expected Seasonal Movement	Seasonally Adjusted Change
Las Vegas	1,300	-3,100	4,400
Reno	-1,100	0	-1,100
Carson City	-100	100	-200

the area was expected to gain 100, resulting in a seasonally adjusted decline of 200 jobs.

Despite some volatility over the month, job gains were positive or steady across all three metropolitan statistical areas (MSAs) over the year. Las Vegas held 24,300 more jobs in December 2016 versus the same month last year, a growth rate of 2.6 percent. Specifically, 15,500 jobs were added in service-providing industries while 9,300 were added in goods-producing industries¹. Reno had 7,100 more jobs than last year, a growth rate of 3.3 percent. Of these new jobs, 6,800 were service-providing and 600 were in goods-producing industries. Finally, Carson City employment remained steady over the year. Employment in goods-pro-

¹ References to total MSA employment are adjusted for seasonality, whereas references to goods-producing and service-providing industries are not.

ducing industries did not change, while service providers added 100 jobs.

Statewide, Nevada has reached record employment levels in 2016, surpassing the pre-recession peak by more than 8,000 jobs. These gains are most prominent in Las Vegas, which in December had 15,400 more jobs than its pre-recession high nine years ago. Reno/Sparks and Carson City have not yet surpassed their pre-recession peaks from March and April of 2007, respectively. Reno's total employment, at 221,300 in December, is only 4,100 jobs shy of the all-time peak. Carson City, at 28,100 jobs in December, is 5,200 lower than the historical high for that area.

This month we examine long term employment projections for Nevada's major population centers, in addition to a combined area referred to as West Central Counties (Churchill, Douglas, Lyon, and Mineral counties), and the Balance of State (all counties not included elsewhere). These projections estimate total employment by 2024, in addition to total job openings over the 2014 to 2024 period. Total job openings are comprised of both new jobs due to industry growth and openings due to re-

placements for workers who retire or change careers. According to the Bureau of Labor Statistics, in most occupations replacement needs commonly account for many more job openings than employment growth alone. Combining these two measures allows for an estimate of the total number of people who will need to be trained to enter the workforce.

Statewide, job totals are projected to grow by 313,300, with another 321,000 openings due to replacements. The Las Vegas/Henderson/Paradise MSA is expected to account for more than 73 percent of all new job openings with 241,500 new jobs and 236,000 openings due to replacements. Reno/Sparks is expected to gain 62,100 new jobs and need 51,800 additional workers for replacements. West Central Counties and the Balance of State will both gain a little over 10,000 new jobs and need between 10,500 and 14,300 new workers from replacements. Finally, Carson City is expected to gain 6,100 new jobs and have 6,700 openings from replacements.

Nevada's unemployment rate stood at 5.1 percent this month, a drop of 1.2 percentage points from December of 2015. Nevada's metro areas also decreased unemployment

by more than one percentage point from this time last year. The jobless rate in Las Vegas declined to five percent this month, down 0.2 percentage point over the month and, more importantly, down 1.2 percentage points over the year². Carson City and Reno/Sparks both saw no change over the month, with Carson City unemployment standing at 5.3 percent and Reno/Sparks at 4.2 percent. However, these rates represent declines of 1.4 percentage points over the year in Carson City and 1.3 percentage points over the year in Reno/Sparks. This month's unemployment rates mark the lowest December rates for the metro areas since 2007 (except in Reno, where the December rate hasn't been lower since 2006).

Unemployment in Nevada's counties remained below seven percent in December, with the lowest rates found in Esmeralda (3.6 percent), Eureka (3.6) and Elko (3.9). The largest over-the-year decline was seen in Mineral, where unemployment stood at just

² The State's seasonally adjusted unemployment rate is 5.1 percent in December, down from 5.2 percent in November and down from 6.3 percent in December 2015. Unemployment rates for the State's metropolitan areas and counties reported here are not adjusted for seasonality. Hence, comparisons to the State's seasonally adjusted rate should be avoided. Legitimate comparisons, however, can be made to the State's unadjusted rate of 4.9 percent in December, down from 5 percent in November and down from 6.1 percent in December 2015.

5.5 percent in December, a decline of 4.1 percentage points from this month last year. Significant over-the-year declines were also seen in Lyon, where unemployment stood at 6.3 percent (down 2.4 percentage points) and in Pershing and Storey (both at 4.9 percent, down 1.9 percentage points over the year). The highest unemployment rates in December were found in Nye (6.3 percent), Lyon (6.3 percent), and Mineral (5.5 percent).

Initial claims for unemployment insurance (UI) were down in every county in Nevada in 2016. The largest nominal declines in the year occurred in Nevada's largest counties, with Clark and Washoe experiencing respective declines of 6,420 and 1,880 claims. On a percentage change basis, ten of the State's counties experienced declines of at least 10 percent over the year, led by Eureka. That

	December 2016 (Year-to-Date)		Change
	2016	2015	
Clark	118,591	125,012	-6,421
Washoe	18,895	20,779	-1,884
Lyon	2,792	3,314	-522
Elko	1,841	2,110	-269
Churchill	977	1,144	-167
Nye	1,614	1,727	-113
Humboldt	706	797	-91

Lincoln	137	153	-16
Storey	60	75	-15
Esmeralda	35	36	-1

*County level totals are not directly comparable to Statewide monthly totals due to reporting differences.

county saw 31 fewer claims in 2016 than in 2015, resulting in a 40 percent decline.

The unemployment insurance (UI) benefits exhaustion rate, which measures the average share of UI recipients that run out of benefits before finding employment, has largely recovered from its recessionary peak at the Statewide level. When the exhaustion rate is considered on a county-by-county basis, it becomes clear that the exhaustion rate is more representative of a claimant's experience in Nevada's largest counties. The less populated counties, such as Esmeralda, Eureka, Storey, and Mineral, had the highest average exhaustion rates in the State in 2016. Esmeralda had the highest of all, with an average of 63 percent of UI recipients running out of benefits. The higher levels of exhaustion are at least partially driven by the smaller number of employment opportunities in these counties. The lowest exhaustion rates were in Elko, Churchill, and Washoe, which had exhaustion rates of 31.8, 31.9, and 33.4 percent, respectively. Clark County, the source of most of Nevada's UI claims,

had an exhaustion rate of 38.8 percent, nearly identical to the Statewide average.

Online job posting activity³ was up in all 17 Nevada counties in 2016. The largest volume of job ads were for positions in Clark, Washoe, and Carson City. Employers posted 152,000 online ads for jobs in Clark County, an increase of 7,500 over 2015. Washoe's online job ad activity rose to 41,600 for the year, up 6,700 from last year. Carson City realized an increase of 2,600 ads this year, with employers posting 8,500 total job ads for the area in 2016.

Online job postings also allow us to see which employers posted the most job ads in 2016. Gaming and healthcare employers led the way in Reno/Sparks, Carson City, and Las Vegas. Two of the top five job posters in each metro area were related to healthcare. Hospitals were the largest recruiters in Carson City and Reno/Sparks, and the third largest in Las Vegas. Gaming and accommodations were also large employers, filling in the remaining top spots in Reno/Sparks and Las Vegas. Carson City saw slightly more variety, with manufacturing (Precision Castparts) and retail (Lowe's).

Online Job Posting Activity by County			
	2016 Online Job Postings (Full Year)		Change
	2016	2015	
Clark	152,003	144,468	7,535

Pershing	340	286	54

³ Online job postings are obtained through DETR's Silver State Solutions initiative. Online job posting volume does not necessarily correlate with the level of job openings or hiring. Internal company hiring and union hiring are often not captured by online ads. High ad volume often occurs for occupations/industries that are having difficulty finding qualified candidates, high turnover positions/recurring openings, or when companies are building large candidate pools. Online job postings should only be used with caution when developing/analyzing time series trends due to the constant changes in the rate of online advertising usage and in the methods used for collecting the data.
